

YOUR COMPLIANCE

OUR RESPONSIBILITY

Industrial Wastewater Treatment Complex

Supporting the growth of Singapore's high-value chemical industry sector, NSL OilChem Waste Management has a new Industrial Wastewater Treatment Complex that is designed to treat a wide spectrum of industrial wastewater from industries such as Petrochemicals, Pharmaceutical and Automotive.

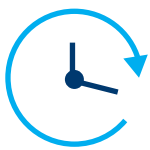

With a robust Research & Development panel set to find innovative technologies to meet challenges in industrial wastewater management and a well-equipped lab that can conduct a range of treatability studies, NSL OilChem is confident to tailor an optimum and cost effective treatment solution for your wastewater.

Ready by end 2018, the new complex has a wastewater treatment capacity of 1,000m³ a day. It uses advanced technologies to treat wastewater to comply with Public Utilities Board (PUB) effluent standards.

Priding ourselves as an environmental advocate, NSL OilChem Waste Management treats industrial wastewater responsibly.

Fast Facts

Ready by
end **2018**

Located along
Tuas Avenue 10
and operates
round-the-clock

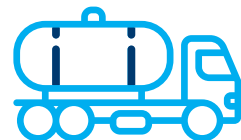

Provides business
advisory and
technical consultancy

Has wastewater
treatment capacity
of **1,000m³**
per day

Uses modern

treat wastewater
that meet effluent
discharge standards

Owens a fleet of
vehicles to collect
wastewater from
customers' premise

“NSL OilChem Waste Management is committed to developing advanced technologies and processes to meet the challenges of industrial wastewater management. This is done with the support and also continuing R&D collaboration with the Nanyang Environmental and Water Resources Institute (NEWRI) at Nanyang Technological University (NTU), Singapore, and also other academic institutions.”

– Professor Ng Wun Jern

School of Civil & Environmental Engineering, NTU Singapore.
Recipient of the 2017 President’s Technology Award and
Founding & Immediate Past Executive Director, NEWRI.

About NSL OilChem Waste Management

Established in 1997, we specialise in oil-and-chemical waste management and the distribution and supply of diesel, fuel oil, marine bunkers, lubricants and fuel management services.

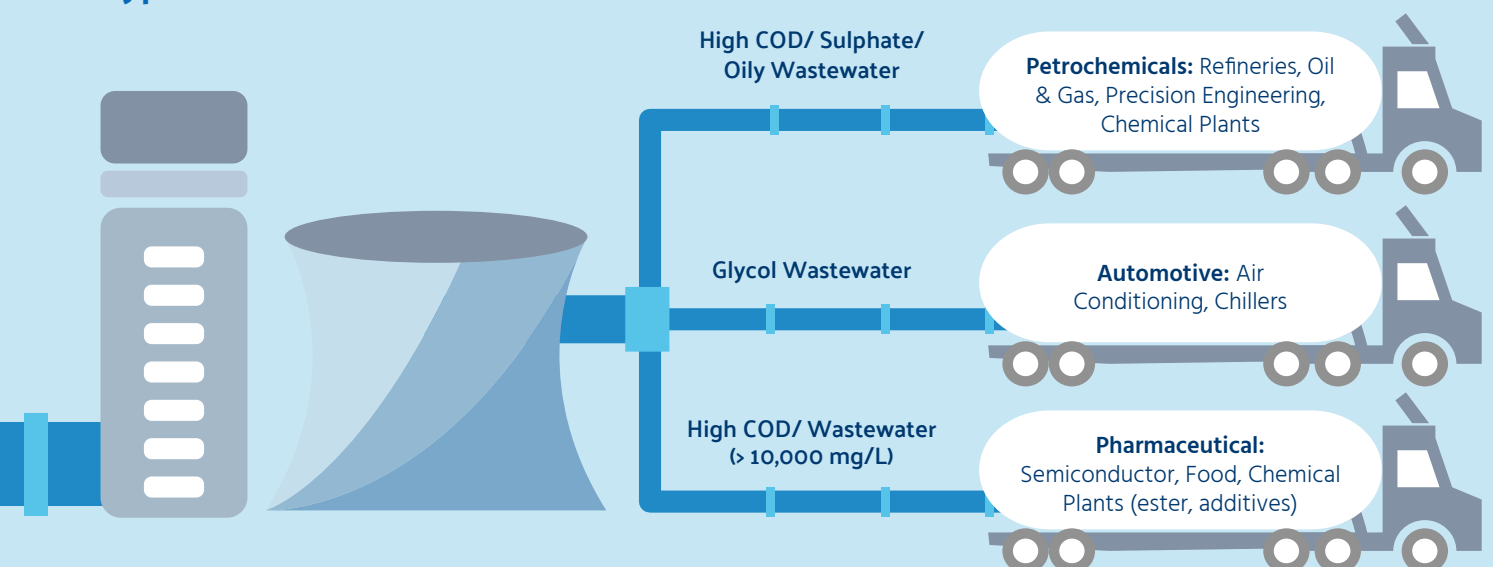

A leading integrated waste management company, our business activities contribute to

environmental sustainability. Through harnessing technology as an enabler to enhance our customer experience and operating efficiency, we offer prompt, reliable and safe collection services with our fleet of specialised vehicles and barges equipped with GPS tracking devices.

At NSL OilChem Waste Management, we adopt best business and environmental practices that offer waste management solutions for our customers, while protecting the environment.

NSL OilChem Waste Management is the environmental arm of NSL Ltd, a leading industrial group in Asia Pacific listed on Singapore Exchange.

Types of Wastewater We Treat

Trade effluent discharge legislations are tightening, and I want to adhere to the high compliance standards

I am looking for a partner who can provide a one-stop service, from collection to disposal of wastewater

Experience these issues? Talk to us, we'll solve them

I want to outsource my wastewater needs

My business pursues sustainability

I seek an efficient and cost effective wastewater solution for my business
